SUMMARY

Software Engineer and Python Backend Developer with experience building RESTful APIs, database-driven applications, and full stack web solutions using Django, FastAPI, and Flask. Skilled in developing scalable and reliable software with a strong foundation in Software Quality Assurance and Agile practices. Passionate about writing clean, maintainable code and contributing to innovative backend and web development projects.

WORK EXPERIENCE

SQA & Project Management Intern | Intrapreneur — Sep 2025 - Dec 2025

- Owned end to end QA and project coordination across web and mobile applications in a full Agile environment.
- Identified 100+ bugs and wrote 50+ test cases; detected a critical security vulnerability related to unauthorized admin deletion.
- Managed Jira workflows and sprint ceremonies, and implemented Jira to GitHub automation to streamline issue tracking.
- Collaborated with teams including developers, designers, and product managers, and contributed to strategic sprint decisions.

Tools: Jira, GitHub, Postman, Google Sheet, MS Office, selenium

Technologies: Agile, API Testing, Regression Testing, Bug Reports, Test Cases.

AI Development Intern | Skills Hunger — Jun 2025 - Jul 2025

- Built AI powered backend tools and data pipelines using Python, NLP, and LLMs, with Streamlit dashboards backed by Pandas DataFrames.
- Applied prompt engineering and NLP techniques, and contributed to research and prototyping with measurable outcomes.

Tools: Streamlit, Jupyter Notebook, VS Code

Technologies: Python, Numpy, Pandas, Matplotlib, Scikit Learn, NLP, LLMs.

IT Instructor | Harbor Academy — Jul 2023 - Jan 2025

- Teaching Python, JavaScript, web development, and databases to 100+ students.
- Developed structured curriculum and demonstrated strong communication and adaptability across beginner to advanced learners.

Tools: VS Code, GitHub, Postman, Jira

Technologies: Python, JavaScript, SQL, Web Development

Social Media Manager & WordPress Developer | Freelance — Dec 2022 - June 2025

- Managed multiple client projects simultaneously, including content, campaigns, and deliverables across major platforms.
- Built and maintained WordPress websites and used AI tools such as ChatGPT and Canva AI for content strategy and performance optimization.

Tools: WordPress, ChatGPT, Gemini, Canva AI, Capcut.

Technologies: Content Strategy, SEO, Campaign Management

SKILLS

Programming Languages: Python, JavaScript, SQL, HTML, CSS.

Backend Development: Django, FastAPI, Flask, REST APIs, Authentication, ORM/Database Design.

Data & AI: Pandas, NumPy, Scikit learn, Streamlit, NLP, Prompt Engineering, LLMs.

Tools & Platforms: Git, GitHub, VS Code, Postman, Jira, MS Office, Google Tools.

Soft Skills: Ownership and Accountability, Structured Problem Solving, Collaboration, Communication, Adaptability.

PROJECTS

Fixit | Community Complaint Reporting Platform

- Built an MVP backend web platform inspired by the Fixit NGO's social improvement mission, addressing the lack of a structured channel for the public to submit civic complaints, since most people only post problems as pictures or videos on social media without a formal reporting or tracking system.
- Designed the data models and authentication system so registered users can create, update, and delete their own submitted complaints, while visitors without an account can view all submitted complaints along with the name of the person who reported them.
- Implemented server side logic and templating with Django and Jinja2, and built a responsive UI with Bootstrap and custom CSS; current version is an MVP with further backend features planned.

Tools: Git, GitHub, SQLite, Django Admin.

Technologies: Python, Django, Jinja2, Bootstrap, Authentication.

AI Powered Price Trend Analyzer

- Developed an OOP based multilingual dashboard forecasting commodity prices in Sindh using regression models.
- Presented the project at GC University and received a Certificate of Participation.

Tools: Streamlit, SQLite, Git, Github, Visual Studio Code.

Technologies: Python, Numpy, Pandas, Scikit learn, Regression Models.

SafeSafar | School Bus Tracking System | *Team Lead, Final Year Project*

- Developed a full stack student management and tracking system to manage students, drivers, and vehicles through a centralized dashboard.
- Implemented student tracking features with SMS alerts to provide timely notifications and improve communication.
- Built secure authentication and role based access functionality for efficient system management.
- Designed an interactive dashboard for monitoring student records, vehicle information, and driver details in real time.
- Developed complete CRUD operations for managing students, drivers, and vehicles with a responsive user interface.

Tools: Git, GitHub, Twilio SMS API, Bootstrap.

Technologies: PHP, JavaScript, Bootstrap, HTML, CSS, Real time Tracking SMS APIs,

BDZB Foundation Website

- Developed the official website for BDZB Foundation to strengthen its digital presence and streamline information sharing about blood donation initiatives and community services.
- Designed and implemented responsive web pages to showcase the foundation's mission, campaigns, events, and activities.
- Built an intuitive and user-friendly interface to improve accessibility and engagement for donors, volunteers, and visitors.
- Developed dynamic sections for announcements, organizational information, and blood donation awareness programs.

Tools: VS Code, PostgreSQL, Git, GitHub.

Technologies: Python, Django, JavaScript, HTML5, CSS3, Bootstrap, PostgreSQL.

EDUCATION

Bachelor of Software Engineering | University of Sindh, Jamshoro | Feb 2022 - Feb 2026

Relevant Courses: Data Structures and Algorithms, DBMS, Web Engineering, Software Engineering, OOP, Software Project Management, Agile Methodologies

CERTIFICATIONS & RECOGNITION

- AI Job Oriented Skill Development Training | Artificial Intelligence
- Certificate of Participation | AI Price Trend Analyzer, GC University
- Certified Postman | API Fundamental Expert.
- Shield of Appreciation, 3 Day AI Bootcamp.
- Cofounder | IT Lead, BDZB Nonprofit Foundation
